ICLT Resources and Internet Acceptable Use Agreement

Star of the Sea Catholic Primary School has a wireless, networked computer system with access to the Internet and online communication, being email and social media. This system allows students and staff access to common resources from any Interactive Whiteboard, wireless laptop or Apple device, within the school.

These resources include word-processing, publishing, database, graphics and spreadsheet programs, reference materials, learning objects and Apps and filming software. It also gives them the benefit of keeping their own work stored with the BCE Cloud for ease of access.

Using the Internet and email allows students and staff to access information, be involved in online projects and communicate with their own and other school communities.

We provide this service primarily for the educational benefit of students and the professional development of staff. Brisbane Catholic Education has implemented software to provide barriers, which minimise the risk of accessing inappropriate material from the Internet.

Despite the use of these filters, staff and parents must understand that unsuitable sites may accidentally be accessed. If this occurs, children are instructed to follow the steps outlined in the Acceptable Use Agreement.

At Star of the Sea Catholic Primary School, access to the ICLT resources, the school’s ICLT network and the Internet is considered a right and not a privilege, therefore there are responsibilities for all involved.

Responsibilities: Staff

All reasonable measures are taken by the staff at Star of the Sea School to ensure that students use the ICLT network and resources correctly.

They will:

- instruct students in the appropriate use of equipment and acceptable online etiquette including respecting the privacy of other students' work, email procedures (when available for specific tasks), and the need to keep their personal information private.
- provide careful supervision of students using the resources.
- provide planned activities that minimise the potential for inappropriate use of resources and the network and maximise the benefits of resources and the Internet to enrich and enhance classroom programs.
- pre-select the sites they want students to use and provide links to these directly.
- ensure the students know how to search safely and effectively and how to exit from an inappropriate site immediately.
- encourage the students to alert them immediately if a link on a pre-selected page takes them to an inappropriate site so that they can remove the link and contact the site owners to express their concerns.
- help the students learn to evaluate sites using a variety of criteria.
- adhere to the concept of intellectual property and moral rights and ensure
- students know what is meant by copyright and how to cite works appropriately.
- educate students and parents on the use and expectations of Star of the Sea’s Learning Management System (Moodle).
